

Hands-on PCB Design and Electronic Prototyping with Autodesk Fusion

SUMMER ENRICHMENT- LYLES COLLEGE OF ENGINEERING

REVISION 1.0

Day 9: Review

- Advanced Prototyping and Troubleshooting
- Circuit Assembly
 - Through Hole- Amplifier
 - Surface Mount- LDO
- Hands-on Activity
 - Soldering electronic prototypes

Day 10: Final Project and Workshop Wrap-up

- ECAD Tool Overview
- SMT Assembly Overview
- Rapid Prototyping Techniques
- PCB Circuit Testing
- Time to take a Victory Lap

Day 10: Final Project and Workshop Wrap-up

- Time to take a Victory Lap
- You now have more PCB experience than most students in the LCOE
 - You have:
 - Created 2 Schematics
 - Created 2 PCB Layouts
 - Assembled 2 PCBs
 - 1 Surface Mount
 - 1 Through Hole
- Future Resources and Next Steps
 - Recommendations for further self-learning
 - PCB design community resources, forums, manufacturers
 - Industry insights and practical tips for career readiness

Future Resources and Next Steps

- Recommendations for further self-learning
- PCB design community resources, forums, manufacturers
- Industry insights and practical tips for career readiness

AI Minute

-
- Please type the following prompts into the AI Tool of your choice, Chat GPT, Gemini, Grok, Copilot, etc...
 - **Can you provide a list of 25 recommendations for further self-learning about printed circuit board design and manufacturing? I just completed a 2 week workshop on PCB design using Fusion Electrical.**

What Next

- You have already learned about the basics of PCB design and assembly.
- You need to practice to keep the skills you have learned.
